

AppleTV

** For Mac users (iPhones, iPads & Macbooks)

1. Connect to the “MeetingRoom” wireless network
2. Use the TV remote to change the TV to the correct input
3. On your device, turn on “mirroring” or select “AirPlay”
 - a. AirPlay should be located in the swipe-up menu at the bottom or from the status bar at the top of your device’s display

4. From the popup menu on your device, select AppleTV as where to mirror
5. An AppleTV code should appear on the TV screen
6. Enter the AppleTV code on your device
7. Device’s content/display should now be mirrored on the TV

When you are ready to disconnect your device from the TV:

1. Swipe-up the menu and touch the AirPlay icon
2. From the pop-up menu, Turn off Mirroring
3. From the pop-up menu, Select iPad as the primary display

If you are having technical difficulties connecting to the AppleTV you can try restarting the device:

1. Select “menu” on the AppleTV remote
2. Navigate to “settings” then select “general”
3. Scroll to the bottom of the list of options and select “restart”
