

3D Cactus

Instructions

1. Think about what type of cactus you would like to make
2. Use green ovals or circles to create the cactus body |
3. Fold 1 circle or oval in half |
4. Fold another circle or oval in half
5. Glue these two halves next to each other, the halves that weren't glued down will create the 3D look. |
6. Decorate your background and add details such as spikes or flowers by cutting yellow, pink and red scrap paper. |
