Tech Talks: News Strategies & Apps (Apple/Android)

Exploring strategies and apps for managing your digital news

There are so many mobile apps communicating digital information. How do you manage all this news? How do you focus on what is most helpful?

Strategies	Apple	Android
News Apps Download and use apps from your trusted news source	Open App Store > Search “News” > Get > Open	Open Play Store > Search “News” > Install > Open
Aggregators Get the information you need by customizing the inputs of a news aggregator (Apple News, Google News, Feedly)	Apple News App > Following > Search for topic OR Discover Channels & Topics > **plus sign**	Google News App > Following > **View all and manage**
Text to Speech Listen to news by sharing articles to 3rd-party app	From desired article > Find **Share icon** (square/arrow top-right) > Select “Pocket” from apps row > Save	From desired article > Find **Share icon** (node icon bottom-right) > Select “Add to Pocket” from apps row
