The Immortal Life of Henrietta Lacks
by Rebecca Skloot
Henrietta Lacks was a poor Southern tobacco farmer who worked the same land as her slave ancestors, and whose cells--taken without her knowledge when she was treated for cancer in 1951--have become one of the most important tools in medicine. The Lacks family did not learn of Henrietta's cells until 20 years after her death, but these first "immortal" human cells grown in culture are still alive today: they've been bought and sold by the billions and have been vital in fighting polio, cancer, and many viruses. This incredible book explores race, bioethics, scientific research, human rights, the power of family, and the question of whether we control the very cells we're made of.

Lab Girl
by Hope Jahren

Leonardo Da Vinci
by Walter Isaacson
Based on thousands of pages from Leonardo da Vinci's astonishing notebooks and new discoveries about his life and work, Walter Isaacson "deftly reveals an intimate Leonardo" (San Francisco Chronicle) in a narrative that connects his art to his science. He shows how Leonardo's genius was based on skills we can improve in ourselves, such as passionate curiosity, careful observation, and an imagination so playful that it flirted with fantasy. He produced the two most famous paintings in history, The Last Supper and the Mona Lisa. With a passion that sometimes became obsessive, he pursued innovative studies of anatomy, fossils, birds, the heart, flying machines, botany, geology, and weaponry. He explored the math of optics, showed how light rays strike the cornea, and produced illusions of changing perspectives in The Last Supper. His ability to stand at the crossroads of the humanities and the sciences, made iconic by his drawing of Vitruvian Man, made him history's most creative genius. In the "luminous" (Daily Beast) Leonardo da Vinci, Isaacson describes how Leonardo's delight at combining diverse passions remains the ultimate recipe for creativity. So, too, does his ease at being a bit of a misfit: illegitimate, gay, vegetarian, left-handed, easily distracted, and at times heretical. His life should remind us of the importance to be imaginative and, like talented rebels in any era, to think different. Here, da Vinci "comes to life in all his remarkable brilliance and oddity in Walter Isaacson's ambitious new biography...a vigorous, insightful portrait".

**Steve Jobs**  
by Walter Isaacson  
Based on more than forty interviews with Steve Jobs conducted over two years--as well as interviews with more than 100 family members, friends, adversaries, competitors, and colleagues--Walter Isaacson has written a riveting story of the roller-coaster life and searingly intense personality of a creative entrepreneur whose passion for perfection and ferocious drive revolutionized six industries: personal computers, animated movies, music, phones, tablet computing, and digital publishing. Isaacson's portrait touched millions of readers. At a time when America is seeking ways to sustain its innovative edge, Jobs stands as the ultimate icon of inventiveness and applied imagination. He knew that the best way to create value in the twenty-first century was to connect creativity with technology. He built a company where leaps of the imagination were combined with remarkable feats of engineering. Although Jobs cooperated with the author, he asked for no control over what was written. He put nothing off-limits. He encouraged the people he knew to speak honestly. He himself spoke candidly about the people he worked with and competed against. His friends, foes, and colleagues offer an unvarnished view of the passions, perfectionism, obsessions, artistry, devilry, and compulsion for control that shaped his approach to business and the innovative products that resulted. His tale is
instructive and cautionary, filled with lessons about innovation, character, leadership, and values.
